Dear Parents and Carers,

Please find attached to this letter information regarding Proston State Schools re-vamped Incident Management Framework.

The key objective of the framework is to create a consistent approach to consequences stemming from negative student behaviours. The framework will also ensure a constant stream of communication to parents and carers regarding behaviours occurring at school. Parents and carers will have an obligation to review and sign off on behaviour contracts that come home with the student. This contract will be followed by a phone call from the teacher or principal to ensure the information has reached you regarding the incident that has occurred at school.

The framework as seen attached, will be enforced from P-10 and while it is being implemented from the start of term 4, will potentially go through refinements as we look at the data stemming from the framework.

As always we are always open to feedback and know this new approach to incident management will be a work in progress until we begin to see concrete results.

Please call the school if you have any feedback or concerns regarding the framework.

Yours in education,

Ryan Pedley
